Open letter to the citizens of the United States

Wednesday, February 28th, 2007.

Dear Americans,

According to the most recent polls, now two thirds of you are against the increase of American military forces in Iraq and the majority is in favour of a swift withdrawal.

Finally! Four years, a war expense of more than one thousand billion dollars, a number of dead soldiers higher than the one of the 9/11 victims plus hundreds of thousands of Iraqi civilian victims, past before the majority of you would realize the invasion (that's what it is) of Iraq was a mistake and that all presuppositions declared by those wanting that war where false: in Iraq, there where no weapons of mass destruction nor terrorists (now yes, and many).

In Iraq there was only a population starved by ten years of embargo, a dictator supported for years by the same United States and lots of oil that had been denominated in euros instead of dollars since 2000. And, the decision of selling petroleum in euro instead of dollars was about to be taken also from the other OPEC countries, in the Middle East as in Asia, Africa and Latin America.

If great part of petroleum didn't have to be paid in dollars anymore, buyers wouldn't need dollars and therefore the dollar would have become less popular and probably would have lost between 40 and 60% value in just a few months. In fact, all the world (you too) knows the actual value of the dollar, issued devoid of any coverage or guarantee (dollars are almost pieces of paper worth nothing), only depends on the fact it is the currency used to pay oil.

The Iraqi issue should teach something. First of all your Government doesn't tell the truth not even to its people. Also, the same Government doesn't represent the interests of the majority of its citizens but only the ones of the banks and oil companies. Finally, American democracy isn't very ill anymore, indeed, it doesn't exist, not even formally, because it doesn't even express your will: 6 out of ten of you don't vote and Government is only elected by 20 per cent the citizens.

Why 6 out of 10 don't vote? Because you don't agree with any of the two parties you have to subscribe in order to exert your vote. You say there is no difference between them. Therefore you think it's useless to vote. And perhaps you're right. There's the need for a new mass party, a political force able to represent the majority of you, the ones who don't vote as the ones voting for one of the two existing parties only because there aren't alternatives.

The new American political force could be named Renewal. It shouldn't only be an election instrument but a means for the constant participation to the American political life, a means to know, survey and censure what is done by the elected during all the time they are in power.

Do Renewal. Organize a new political force proposing a real change of the American society and of its domestic and international relations. It's the only way to overcome the effects of the probable economic, financial and monetary catastrophe that you, American citizens, are about to face.

With a real renewal you'll be more free, you'll have a more just society and you will all be able to fight better for your happiness.
